Education

Louisiana State University (LSU), Baton Rouge, LA **May 2027**
Bachelor of Science in Computer Science, Minor in Robotics Engineering *GPA: 3.842*

Relevant Coursework

Machine Learning and Data Analytics, Artificial Intelligence, LLM Development, Assistive Robotics, Advanced Data Structures, Operating Systems, Software Systems Development, Database Systems, Computer Organization and Design

Experience

MikeGPT **June 2026 – Present**
Frontend Software Engineer Intern *Louisiana State University*

- Develop and maintain React interfaces for an AI/LLM platform, building reusable workflows for chat, agent configuration, administrative tools, skills, resources, databases, and file management.
- Built frontend integration testing infrastructure with Vitest, React Testing Library, and MSW, covering APIs, authentication, routing, state transitions, and core user workflows.
- Implemented real-time LLM streaming interfaces for tool execution and search sources, displaying interactive progress, source previews, and streamed responses.

LSU TigerRacing FSAE **July 2025 – Present**
Team Member *Baton Rouge, LA*

- Develop and maintain a React-based internal platform supporting member management, task tracking, and project coordination for a 60+ member Formula SAE organization.
- Collaborate with engineering team leads to translate operational requirements into scalable software features, using Git and GitHub for version control and team-based development.

Projects

AI Safety Reporting Assistant | *React/Next.js, ASP.NET Core, C#, PostgreSQL, OpenAI API* **Jan. 2026 – May 2026**

- Developed an AI-powered safety reporting assistant for Performance Contractors to help interpret incident reports and generate risk-focused safety insights.
- Built a full-stack application using React/Next.js, ASP.NET Core/C#, PostgreSQL, and OpenAI integration to support structured report intake, analysis, and response generation.

The Wanderer – ABB GoFa | *RISE Lab, LSU / Unity, C#, ABB EGM, RobotStudio, RAPID, UDP* **2026 – Present**

- Developed a Unity-to-ABB GoFa integration layer that translates virtual robot motion into Cartesian targets for real-time control through ABB Externally Guided Motion (EGM).
- Implemented coordinate transformations, quaternion handling, workspace validation, and UDP communication in C# to safely map Unity world poses to ABB robot poses.
- Integrated Unity with an ABB GoFa virtual controller in RobotStudio by adapting RAPID and EGM communication workflows for virtual-to-physical robot control and digital-twin research.

Robotics Virtual Twin Research Project | *RISE Lab, LSU / NASA Research Project* **Jan. 2026 – Present**

- Developed a robotic digital twin platform linking a physical robot with a Unity-based virtual environment and VR interface, enabling real-time robot visualization, control, and testing.
- Contributed to active localization and remote-operation research by integrating robotics hardware, sensor feedback, and simulation tools to support NASA-focused robotic exploration use cases.

Leadership / Extracurricular

Rising Dragon Lion Dance Team **Dec. 2021 – Present**
Head Captain *Marrero, LA*

- Lead and coordinate a 42-member performance team, overseeing practices, training, and execution across frequent community, cultural, and private events.
- Serve as the primary client liaison, managing scheduling, expectations, and logistics for weddings and festivals while directing real-time coordination during live performances (300+ volunteer hours).

Technical Skills

Languages: Python, C#, C, Java, JavaScript, TypeScript, SQL
AI / Machine Learning: OpenAI API, LLM Development, Machine Learning, AI Integration
Robotics / Simulation: ROS 2, Unity, ABB EGM, RAPID, RobotStudio, VR Teleoperation, Digital Twins
Web / Frameworks: React, Next.js, ASP.NET Core, HTML/CSS, PostgreSQL
Testing / Tools: Vitest, React Testing Library, MSW, Git, GitHub, Linux, Microsoft Azure
Languages Spoken: English (Fluent), Vietnamese (Conversational)
